HEOS App Network Shares Setup Procedure

With the release of the latest HEOS App you will now see a new option in the HEOS App called "Network Shares" What Does The Network Shares Function Do?

Network Shares will allow the user to access music files (including iTunes music) from a PC or Apple Mac making the music files accessible from the HEOS App.

- 1. Open the HEOS App and go to Music > Settings
- 2. Select "Music Sources"
- 3. Select "Network Shares"

- 7. The "Network Shares" screen appears showing the "Music Folder" share name. Click the "X" in the upper right of the screen.
- 8. From the Music tab select the **"Music Servers"** option
- 9. From "Music Servers" you will now see the "Music Folder" network share name. Select the "Music Folder"

- 10. Select "Browse" from the Music folder options.
- 11. Select "Browse Folder".
- 12. After selecting "Browse Folder", you will see the supported music files listed that are available to play on the HEOS device

If the network share becomes inaccessible:

- 13. Go to Music > Settings > Music Sources > Network Shares > Select the share name (Steps 1, 2, 3,7) and tap "Connect".
 - a Make sure that "Status" shows "Connected (Indexed)"
 - **b** If the Status remains blank, please verify your shared network resource (such as the computer containing the music) is

connected on the same network and powered on
