HEOS App Network Shares Setup Procedure

With the release of the latest HEOS App you will now see a new option in the HEOS App called **"Network Shares"**

What Does The Network Shares Function Do?

Network Shares will allow the user to access music files (including iTunes music) from a PC or Apple Mac making the music files accessible from the HEOS App.

Procedure to access the "Network Shares" option setup:

1. Open the HEOS App and go to Music > Settings.

2. Select **"Music Sources".**
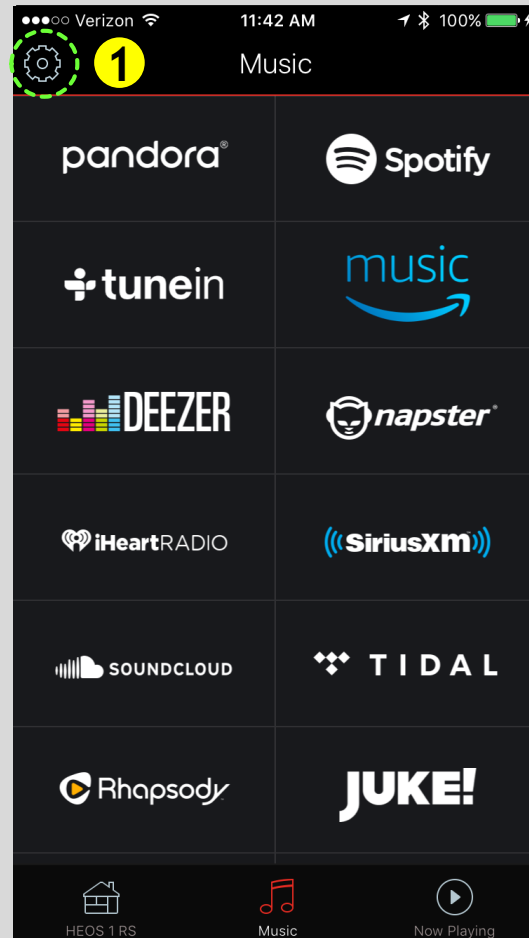

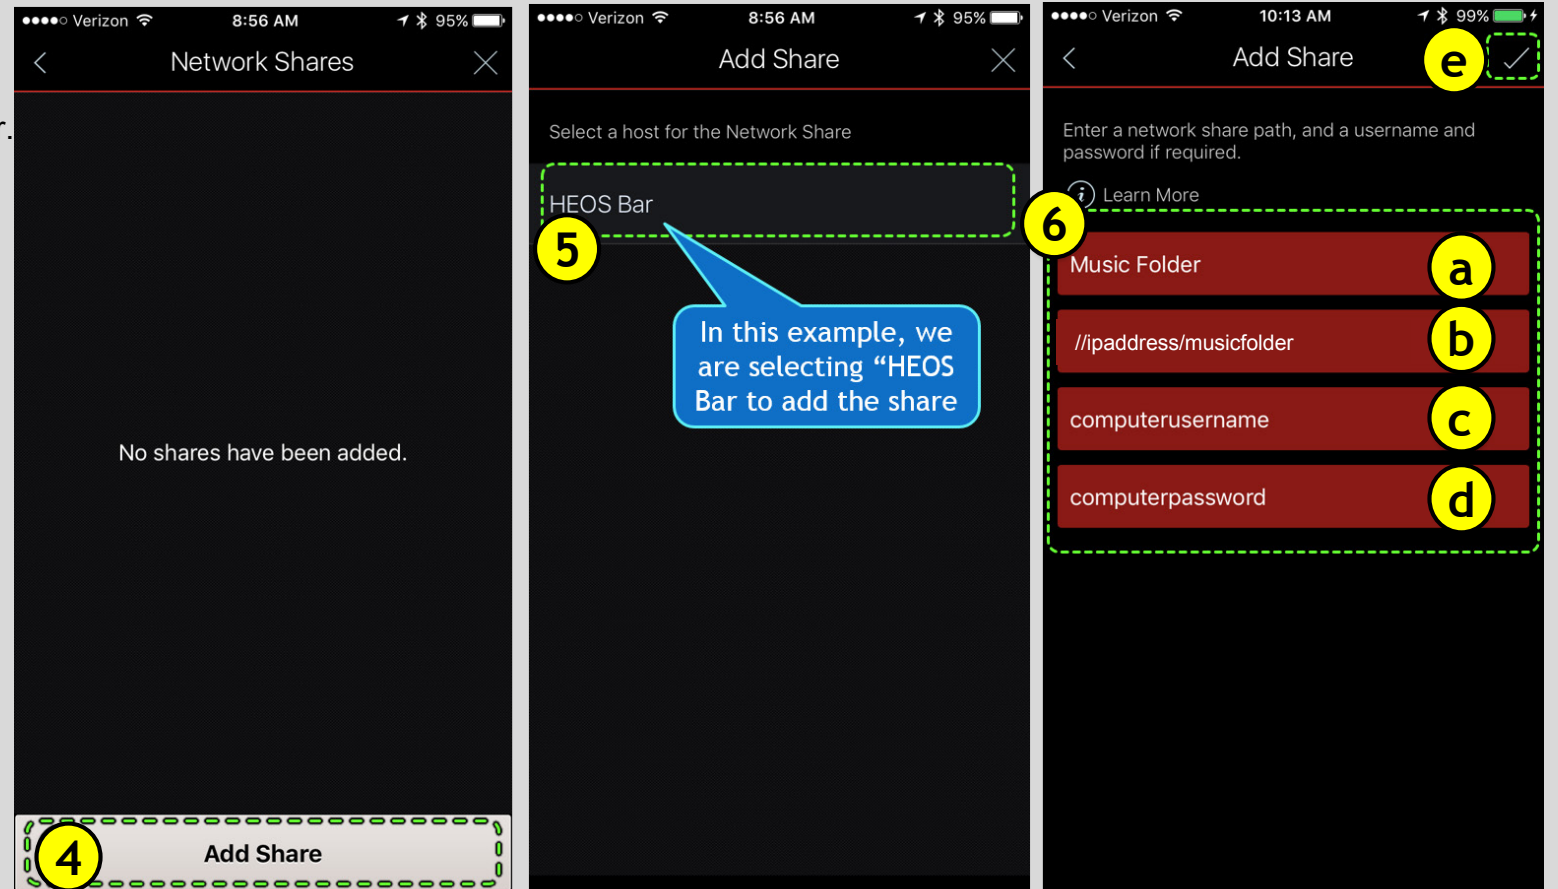

3. Select **"Network Shares"**.

HEOS App Network Shares Setup Procedure
